

Python Developer (Graduate) - Acme Ltd
Company: Acme Ltd
Location: Nottingham (hybrid)

About the role

We are looking for a graduate Python developer to join our small product team building web services for logistics customers.

You will

- Build and maintain REST APIs using Python and Flask
- Write SQL queries and work with PostgreSQL databases
- Package services with Docker and deploy them to AWS
- Use Git and GitHub for version control and code review
- Write automated tests with pytest
- Work closely with the team in an Agile / Scrum environment

You have

- Strong Python skills and an interest in web development
- Good communication and teamwork
- Problem solving and attention to detail
- Experience with JavaScript or React is a bonus
